

# Aquadopp Profiler 600 kHz

500m, Z-Cell, Generation 2

**Up to 40 m current profiling range and no blanking; ideal for mean and boundary current measurements**

Need to collect accurate 3D currents very near the seabed or sea surface, in addition to a full water-column profile?

The Z-Cell (Zero Cell) 600 kHz Aquadopp allows current measurement to start right at the instrument's level through an innovative approach: it has side-looking beams fully integrated into the instrument's head, effectively removing the blanking distance normally applicable to ADCPs.
